

**WINTV-HVR-950 HYBRID TV RECEIVER
NOW AVAILABLE FOR PCS, NOTEBOOKS**

**Watch & Record Over-the-Air ATSC digital TV or
Analog Cable TV with Pocket-Sized "Stick" TV receiver**

Hauppauge, New York- January 5, 2007 - Hauppauge Digital, Inc., the world's leading developer and manufacturer of analog and digital video, TV, and data broadcast receiver products for personal computers, announces the addition of the pocket-sized WinTV-HVR-950 Hybrid TV Receiver to its WinTV family of PC-based TV receivers. Whether at home or on the go, you can now use your PC or laptop to watch and record your favorite analog or over-the-air ATSC digital TV shows with one click.

The easy-to-install WinTV-HVR-950 Hybrid TV Receiver allows you to watch and record analog cable TV or the new ATSC HD digital TV on your PC or laptop screen. Just plug it into your computer's USB 2.0 port, connect a cable TV or a TV antenna, and load the software from the installation CD. The WinTV-HVR-950 also includes a portable digital antenna so you can receive digital TV while you travel. To check the ATSC digital transmissions in a given area, just input the Zip code at <http://www.titantv.com>.

The WinTV-HVR-950 includes Hauppauge's WinTV2000 application for watching and recording analog or ATSC digital TV in a window or a full-sized screen using high-quality MPEG-2. If you live in an area that receives both analog and digital TV, you can switch automatically between analog and digital channels, and the WinTV-Scheduler lets you record your favorite analog or digital TV shows on a daily, weekly, or once-only schedule to play back to your screen at any time.

Even if your area does not currently receive ATSC digital TV, use the WinTV-HVR-950 to watch and record analog TV, knowing that you are prepared for the future. When ATSC digital TV does come to your area, your WinTV-HVR-950 will receive the new digital channels.

WinTV-HVR-950 retails for \$99.-, and it is available through CompUSA and Circuit City electronic stores.
